4. Other Career Services
Under WIOA, Core and Intensive Services were collapsed into one single category of Career Services. WIOA law defines the activities described below as “Other services needed” within the Career Services definition and are generally included as part of an “intensive” case management philosophy.

i. Assessment
Assessment involves gathering information, appraising, analyzing, and using it to assist participants. Assessments of the skill levels and service needs of adults and dislocated workers may include diagnostic testing and use of other assessment tools; and in-depth interviewing and evaluation to identify employment barriers and appropriate employment goals.

The goal of an assessment is to identify skills, strengths, and deficiencies, and attitudes relating to vocational training, basic education, and employment. Assessments may be used for career discovery and specific job applications. It forms the basis for career services by measuring academic development, workplace skills, interests, job seeking and retention skills, financial situation, work readiness, employment and family barriers, and ability to learn to do work tasks.

A thorough assessment of a participant should identify whether or not a participant has:
- Adequate basic education, skills, and work background for their choice of WIOA services or employment opportunities.
- Required occupational tasks and any skills the participants must develop to achieve their employment goals.
- Realistic job seeking skills and the work maturity (attitude) to get and keep a job.
• Sources of additional support needed for success and the agencies that can provide this support.

The contractor shall provide assessment services including assessment of basic skills, abilities, interests, evaluation of work history, evaluation of support service needs and other assessment instruments that might be of value in assisting the customer. All assessment processes and tools must be approved by WorkSource Coastal (WSC) Administrative Staff prior to implementation and must be applied in a consistent and equitable manner. The Contractor will select appropriate assessment tools to use.

**ii. Individual Employment Plan and Objective Assessment Summary**

The Individual Employment Plan (IEP) is developed based on the results of the completed comprehensive assessment.

The IEP must identify primary educational and employment goals, describe the training activities and appropriate services the Adult or Dislocated Workers will participate in to achieve those goals. The Contractor must write the IEP with the participant based on assessment results. The IEP shall be reviewed at least quarterly or more often as needed with the participant to evaluate progress and make any necessary adjustments. This continued evaluation will ensure progress toward the achievement of the participant’s employment goals, training objectives, and advancement of one or more educational levels within the program year.

In addition, the Case Manager must complete an Objective Assessment Summary (OAS) for each WIOA participant outlining their academic levels, skill levels and service needs. An OAS is developed during the participant’s intake process. The OAS must include a review of their basic skills, occupational skills, prior work experience, employability, interests, aptitudes, supportive service needs and developmental needs to be addressed during case management contact in efforts to eliminate concerns before/during training services.

The Contractor must ensure that both documents are developed and documented in the VOS case management system. Each participant receiving WIOA career services will jointly develop an IEP and OAS with the assistance of a case manager.

**iii. Case Management**

Case management is the provision of a client-centered approach in the delivery of services, designed:

- To prepare and coordinate comprehensive employment plans, such as service strategies, for participants to ensure access to necessary WIOA activities and supportive services, using, where feasible, computer-based technologies; and
