This is to procure a construction contract for the trenchless rehabilitation of a fifty-four-to-sixty-inch main sewer line and vaults/junction boxes at the President Street Wastewater Treatment Plant from Vortex Companies through the HGAC Cooperative Purchasing Program in the amount of \$701,065

This purchase is to rehabilitate the fifty-four-to-sixty-inch line and the two associated vaults/junction boxes on the north and south sides at 1400 East President Street. These two vaults/junction boxes and the sixty-inch main sewer line convey all of the City of Savannah sewage from Montgomery Crossroads north to the President Street Water Reclamation Plant. Failure to rehabilitate these lines and vaults/junction boxes could result in catastrophic failure of this infrastructure resulting in a massive sewage spill into the Savannah River. This main and the junction boxes have met their useful service life. The rehabilitation is being done through a Trenchless process and includes the by-passing of the sewage while the rehab coating is being done.

Per Section 2-4154 of the City's Purchasing Ordinance, the City may purchase goods or services through the use of a state contract. The contract used for this procurement is a HGAC Cooperative contract for Trenchless Pipeline Rehabilitation Services (Contract No. TP07-18). It was competitively bid by HGAC and expires on June 30, 2022.

The vendor is:

Vortex Companies (Winder, GA)<sup>(D)</sup> \$701,065

(D) Indicates a Non-Local, Non-DBE owned business.
