NOTES

Recommend approval to renew a contract for software management and validation codes with Parkeon in the amount of \$332,448.

The software management includes two-way wireless connectivity, wireless airtime fees, on-line access to hosted secure server, processing and storage of all transactions, maintenance, alarms, credit card authorization account set-up and management, and secure user rights management.

The Validation Codes software will allow the parking patron to access the validation system and input their code to redeem purchased parking time that is applied to the code. Currently each code will allow the parking patron to redeem a predetermined amount of time at each use.

The Multi-space meters will continue to allow parkers the capability to maximize their payment options to use coins, bills, credit cards, smart cards and the mobile parking app as methods of payment.

This is a solesource purchase because Parkeon is the only provider of the meters and softward that are currently used throughout the City.

S.S. Parkeon (Moorestown, NJ)^(D) \$332,448

A pre-bid conference was not conducted as this is a sole source purchase. (D) Indicates a non-local, non-minority owned business. Recommend approval.
