SKIDATA, INC.	12.5	12.5	9.25	8	6.75	9	10.98	6	0	74.98
NOTES										

Recommend approval to procure a parking access and revenue control system from Carolina Time & Aspis Parking in the amount of \$1,987,426. The Parking Services Department will use this system to provide gating and fee computers at all garages. This system will also provide additional payment options for customers, including space pre-payment, paying on foot, and mobile payment. Monthly customers will be able to maintain their accounts online. The system will also allow for centralized garage operation through a monitored office during times when attendants are not present. Additionally, license plate readers will be included with this system.

The method used for this procurement was the request for proposals (RFP), which evaluates criteria in addition to cost. The proposals were evaluated on the basis of qualifications and experience; quality of audit and revenue controls; overall hardware quality and functionality; overall software quality and functionality; quality of support, training, and customer service; references; DBE participation; local vendor participation; and fees.

Five proposals were received in response to this RFP. Of those, three proposals were shortlisted and selected for an interviews before a selection committee of City staff. Of the three shortlisted proposals, one vendor, ITR of Georgia, was deemed non-responsive because the proposer did not submit pricing for the entire project. The remaining two proposals were opened and fully scored.

The proposal was advertised, opened, and reviewed. Delivery: As needed. Terms: Net 30 days. The proposers were:

B.P.	Carolina Time & Aspis Parking (Pooler, GA) ^(D)	\$1,987,426
	SKIDATA, Inc. (Van Nuys, CA) ^(D)	\$2,715,818

A pre-bid conference was conducted and eight vendors attended. (D) indicates non-local, non-DBE owned business.
Recommend approval.
