NOTES

Savannah Police Department uses SmartForce as its web based, software program that allows all members of the department to receive, share, and respond to a variety of different forms of communication covering all aspects of the Savannah Police Department's daily operations. It is a one stop shop for up to date information, announcements, intelligence, briefings, and other types of communication traditionally routed through email or through other less efficient processes. It can be accessed across all of the department's communication platforms. This program increases efficiencies within the department and creates information flow that keeps all members of the agency up to date on all crime information and departmental functions.

SmartForce was previously purchased by the City and approved by Council on March 28, 2019. This is a sole source because the software is currently installed and is a critical component of the Savannah Police Department's infrastructure.

S.S.   SmartSoftware Technologies, Inc. (Greenwood Village, CO)(D) $49,000

(D) Indicates non-local, non-DBE business. Recommend approval.
