

Public Safety Plan

Poe's Tavern Savannah, LLC

7 Martin Luther King Blvd

Savannah, GA 31401

Prepared by Chris Robert

Director of Operations

910-599-6941 chrisr@poestavern.com

- 1) Identification of hours: Monday through Sunday. Open from 11:00 am until 12:00 am each day.
- 2) To address crowds, we have hosts at the front door and managers on the floor every shift. We have a waiting system that will text customers when their table is ready. We have an area inside the restaurant specific for people waiting for tables. We do not have no loitering signs. We have a 16 camera CCTV system, both inside the restaurant as well as on all sides of the property outside.
- 3) We do not have any restaurant owned parking spaces. Customers will park in parking decks or off property.
- 4) We control access to the restaurant by having patrons come in the front door and immediately seeing the host who is stationed just inside the front door. We have gates to limit access to the patio from outside. We will use security guards on high volume shifts. IE: St Patty's Day, event days.
- 5) We will only on very high-volume days/weekends. Such as holidays and St Patty's Day. 2 Guards. We will use a licensed reputable third party local to Savannah. (We have not identified them yet. We will also look into using off duty SPD officers)
- 6) We will ask for ID from every patron ordering alcohol. We will serve one drink per person when ordering from the bar. We will watch for people drinking that did not order for themselves and ask for ID from them as well. Servers will have inserts in their server books identifying the latest date applicable for someone over 21 years old.
- 7) Yes, we allow patrons under 21 to enter as we are a full-service restaurant. We will card everyone who orders an alcoholic beverage.
- 8) Proper training including training manuals. We also have manual fire extinguishers and automatic sprinkler systems throughout the restaurant and in the kitchen hood system.
- 9) Managers and employees are trained to direct patrons to clearly marked exits during emergencies. All staff are trained for emergencies; however, the management team is ultimately responsible for all evacuations. We will have both 911 and non-emergency numbers on speed dial in all managers phones.
