## Security Plan Outline

### 1) Days and Hours of Operation:

- a) We are open currently Monday-Saturday 7:30am-4pm as a coffee shop, pastry shop, and light lunch restaurant.
- b) We hope to extend hours to Monday-Saturday 7:30am-7pm with the service of happy hour, after work beer and wine with our charcuterie boards.

### 2) Specific Measures to address crowd management:

- a) We do not have any no loitering signs as this has not been an issue. We have 4 small tables on property directly in front of the front windows or our establishment. We also have a back courtyard with rear access to the staff parking lot. This gate to the rear remains open during open hours but can be closed and locked to prevent ingress if needed. We strictly follow the fire marshal's capacity number and recommendations, including encouraging overflow to our outside tables should the dining area become too full. All traffic into the property is observed by staff through the rear window and any concerns are addressed to the Owner/Manager. All sales of food and alcohol happen inside and are managed by our POS.
- b) We do not use security cameras on premises at this point.

### 3) Identification of any parking areas:

- a) There is a staff parking lot on premise used by staff and other tenants of the building. We encourage all our patrons to park on the street in the adjacent area. As Bull Street is a corridor between the Ardsley Park and Bingville neighborhoods, and is generally trafficked with commuters, there is rarely an impact to the street from parking increase.

**4) Means of controlling access to premises:**

- a) We have signs posted that indicate that the rear courtyard of premises are under surveillance and that all entrances to property must be through the front door. We will post signage that states that only staff and tenants of the building may park in the parking lot.

**5) Security Staffing:**

We do not employ security guards at our cafe.

**6) Measures used combat underage consumption:**

- a) We card our customers at the point of sale. The customer's age must be inputted into our Toast POS and the sale is restricted if the customer is underage. Our staff is trained to look for discrepancies in license appearance for the possibility of fake ids and also instructed to always check for expiration date on license.

**7) Measures used to distinguish between patrons under- and over-aged 21:**

- a) As we are primarily a cafe that offers a full menu throughout the entire operating day, our beer and wine sales complement the sale of our main offerings. For this reason we are a family-friendly establishment that allows all ages entrance. All customers that consume alcohol on premise will have their identification checked prior to service and their hand stamped to indicate over-age status.

**8) Measures to combat the risk of fire:**

- a) We employ a system of fire extinguishers in the kitchen that are regularly checked and audited by an independent fire safety company. In the case of emergencies we have an evacuation plan to move every person to the rear parking lot and then out to Clifford Street.

**9) Discussion of matters related to managing emergencies:**

- a) Our Owner/Manager remains in primary lead during the event of an emergency. He is trained in basic CPR and first aid practices. Should he be off shift, the shift lead/manager assumes the leadership of the team and the point of contact for instructing customers to evacuate the property. If an altercation arises between patrons, all patrons will be asked immediately to leave the premises. Should the altercation escalate, 911 will be called. In a non-emergency situation where police presence can help to avoid an escalation, the local precinct number will be called.
