

Security Plan for PJ's Thai

Operating Schedule:

PJ's Thai Corner operates seven days a week.

Hours of operation are from 11:00 am to 10:00 pm.

Interior Layout and Surveillance:

The restaurant has an approximate area of 1300 sq feet with around 50 seats.

Two cameras are installed inside the building, positioned in front of the counter and in the kitchen.

"No loitering" signs posted in the area, but we are planning to have one posted in the front area.

Parking Facilities:

There is a large public parking area around the downtown area.

Entrance Protocol:

All customers must enter through the front door of the restaurant.

Security Personnel:

The restaurant does not have dedicated security officers.

ID Verification:

All servers are trained to ask and check IDs when customers order alcoholic beverages.

Additional techniques include calculating the birth year, adding 20, then adding 1, and comparing it with the current year.

If the calculated year is after the current year, the customer is considered not 21.

Family-Friendly Policy:

PJ's Thai Corner is primarily a family food business.

Ninety-five percent of services are from food sales.

Families are allowed into the establishment.

All customers ordering alcoholic beverages are ID-checked.

Fire Safety Compliance:

PJ's Thai Corner has followed all fire codes before receiving the business license.

Several fire extinguishers are located at various points throughout the restaurant.

The main entrance, located less than yards away from seating areas, serves as an emergency exit.

Emergency Procedures:

Restaurant staff are designated to guide customers during emergency situations.

Customer safety is the top priority.

Team members are trained to notify the appropriate department in case of emergencies.

By incorporating these additional measures, PJ's Thai Corner aims to not only meet but exceed the security standards outlined by the Georgia Restaurant Association, ensuring a safe and secure environment for customers and staff.
