

## Security Plan for Aqua Vitae Lounge

1. The bar is open Monday through Saturday, 4 pm.-3 am.
2. We are a small operation with a capacity of 80, which we've never come close to. However, on busy nights a door person is on duty, to supervise the crowd; e.g., addressing any congestion that might occur near the entrance and directing patrons accordingly.
3. The parking area is shared by a few businesses, as we are located in a small strip mall, although we are the only business open at night. And it is located directly outside Aqua Vitae.
4. Since Aqua Vitae is the only business open in the evening, only our customers park in the adjacent lot.
5. We have found that thus far only one security person at the door is required. They have been trained by management to be vigilant about denying underage entry and any suspicious activity.
6. All our staff are capable of determining if a customer is underage by doing the math. It's not difficult. And management is vehemently against serving minors.
7. No one under 21 is permitted.
8. As to risk of fire, the building is cinder block with metal trim. There are some flammable materials inside, but are kept to a minimum. No smoking, obviously, so that's not an issue.
9. In an emergency, there are four exits in each corner of our establishment. Staff is trained to direct customers to the closest exit and away from the building. Also, our alarm system has emergency contact to fire and police.
