

Security Plan Assistance Sheet

- 1.) Monday – Friday = 11am -7pm
Saturday = 11am-5am
Sunday = Closed
- 2.) We make sure our customers remain orderly by always being present. We always have 4 people in front of the restaurant which always provide full attention. We do not have any no loitering signs and we have 4 cameras in our restaurant. The landlord of the building has 2 cameras patrolling the outside of the building.
- 3.) There is only public parking near our establishment.
- 4.) We have no control of who uses our parking spot at our location.,
- 5.) We have no security guards; we are a smaller family-owned business.
- 6.) We will use our Square processing system to enter the date of birth and it will tell us the age. We will also be very cautious about making sure it was typed in correctly by also looking at it ourselves. If you are ordering from a table, then we will just check your identification upon ordering an alcoholic drink.
- 7.) Our restaurant allows all ages in, but if you order alcohol then you will be asked to show identification. There will be no wristbands because we are small restaurants and have less than 50 seats, there will always be 4 people up front that will be cautious of everything.
- 8.) The measures and procedures we have at our location to help ensure no accidental fires is that we have the proper fire detection devices in place which are eg heat sensors, smoke alarm, and gas alarm. We also have fire warning devices, fire alarm systems, fire extinguishers and fire blankets. We also have multiple cameras in the kitchen.
- 9.) In the event of emergency the staff is trained to evacuate patrons first in a calmly matter to the nearest exit and make sure they are far enough away from the threat/fire. We would then make sure everyone has their family members and friends out of the building while contacting 911. Making sure we maintain calmness the best we can. We train the staff in this process and make sure everyone knows where the exit signs are, and the proper distance needed after to evacuate everyone. Joshua Wooten and Alessandro Marra are the owners, so we took the leadership role to make sure we calmly evacuated everyone and to also contact the police and fire department. We have plenty of ways of contacting the fire emergency and devices such as eg heat sensors, smoke alarm, gas alarm, fire warning devices, and fire alarm systems which will automatically alert emergency services. We also have cellular devices which we would call the emergency department.
