RE: Park Assist response for Savannah Airport Garage

Brian,

Thank you for the opportunity to submit a proposal for the Park Assist software features suite. We are excited to help continue to enhance the visitor experience at Savannah Airport and confident that these features will be a major benefit.

Attached in our proposal you will find why Park Assist has the best solution including:

- Proven, patented camera-based guidance technology
- Real-time alerts to assist operations staff with enforcement
- Live streaming or motion-activated video surveillance
- Find my Car capabilities to assist with superior customer experience

On behalf of Park Assist, I want to assure you of our steadfast commitment to make parking at the Savannah Hilton International airport parking garage as efficient, predictable, and enjoyable as possible. Please do not hesitate to call me with any questions or concerns.

Sincerely,

*Thomas Alexander*

### Park Finder (Optional)

With our *Find Your Car* feature, the parker enters the number for a license plate at a touchscreen kiosk or on a smartphone app. In seconds, Parkers will see exact locations of their vehicle on a digital map along with step by step walking directions from the kiosk to their car. This function can also be done via a Pay on Foot Machine utilizing a Parking Ticket.

### Park Alerts (Optional)

Tapping into the integrated LPR built into our camera-based system, our *Park Alerts* software extension enables the ability to specify policies and rules for selected bays, zones, durations or license plates.

### Park Surveillance (Optional)

With *Park Surveillance*, Park Assist's M4 system is able to capture streaming surveillance video whenever motion is detected in or around a space. Or continuously, if desired. Since the M4 system is perched above the driving lane, their dual CMOS cameras have an unobstructed view of each vehicle during its entire stay in a parking space. This provides an expanded level of security that would otherwise be cost-prohibitive.

### Optional Features

Optional Models	Type	Price
Park Finder (Find Your Car)	Annual License	\$2,176.00
Park Alerts	Perpetual License	Included at No Cost
Park Surveillance	Perpetual License	\$44,936.22

**Total = \$47,112.22 (excluding tax, installation, & shipping)**

*\*Please note: Single Mode Fiber will need to be provided to replace the multi-mode that is currently in place*
