SBE (IF APPLICABLE) N/A		
MATRIX (IF APPLICABLE) N/A		

NOTES

Recommend approval to procure six rotating scum troughs from Brentwood Industries Inc. in the amount of \$85,800. The Water Reclamation Department will use the rotating scum troughs to replace the existing equipment that has been operation since 1995 and has begun to degrade. The scum troughs remove grease and scum that has accumulated on the surface of the Water Reclamation Department's rectangular clarifiers. Rectangular clarifiers are long concrete structures consisting of individual basins (units) having common inner walls with inlet and outlet channels. Each tank basin is equipped with a separate sludge collection mechanism that transports the solids settled in the tank into a hopper for withdrawal. The removal of scum during clarification is an essential step to decrease organic loadings and scum buildup in subsequent treatment processes.

This is a sole source because this vendor is the only supplier able to provide the equipment without modifying the existing tanks already in operation at the Water Reclamation plants. Terms: Net 30 days. The vendor is:

S.S. Brentwood Industries, Inc. (Philadelphia, PA)^(D) \$85,800

A pre-proposal conference was not conducted as this is a sole source procurement. (D) indicates non-local, non-DBE business. Recommend approval.
